

KOALAS IN CRISIS Wide Bay Burnett Region

NOW is the time to
take action on
Koala Conservation

Get informed at the

Koala Forum

Finding a way forward to save koalas in the region

Hear from prominent Keynote Speakers and other local experts on:

- *What wildlife rescue statistics tell us about KOALAS IN CRISIS*
- *Planning conservation solutions for urban and rural landscapes*
- *Identification of conservation priorities and management actions*

Associate Professor Jonathan Rhodes (University of Queensland) Jonathan's research has revolutionised our understanding of the landscape ecology of koalas, and how we can better manage koalas at the landscape scale. Chair of the Queensland Government three-member expert panel on koalas.

Dr Alistair Melzer (Central Queensland University) Alistair's research is in koala ecology, including ranging behaviour, habitat selection, and the effects of climate. Importantly, Alistair specialises in the management and planning of conservation needs for regional Queensland's declining koala populations. Member of the Queensland Government expert panel on koalas.

Proceeds donated to
Koala Conservation

\$10

Bauple Recreation Centre
12 Forestry Rd, Bauple
