

# FIND · A · FROG

# IN · FEBRUARY

**Community assistance is needed** to find out where our frogs are living in and around the Mary River catchment (from Maleny to Hervey Bay and west to Conondale and Kilkivan) and coastal areas from Peregian to Burrum Heads and Fraser Island (K'Gari).

**Frogs are a vital component of ecosystems** and are easily affected by changes in the air, water and land: they are good indicators of the environmental health of our region! But they are in trouble world-wide due to habitat loss, pollution and disease.

**We can ALL help them if we know where the frogs live!**

### If you live:

in the Sunshine Coast Hinterland, Noosa, Gympie and Fraser Coast Council regions, get involved in community frog monitoring in February 2019. Collect data to help improve the plight of frogs through awareness and thoughtful management.

### How?

You don't need to be able to identify frogs, just take photos and/or record their calls.

**1. MRCCC Record Sheet** (for photos and recordings)  
It's available on the MRCCC Find a Frog in February website, or call in to our office to pick one up. *The website contains instructions and useful frog information.*

### OR

**2. Frog ID app** (for recordings)  
Sign up and join the 'Find a Frog in February-MRCCC' group and submit your frog call recordings from your phone. *Check out the Frog ID website for more frog information and school resources.*

.....  
All records will be stored in the WildNet database (Q'ld Government) where they can be accessed by researchers, environmental planners and anyone who is interested in frog business.  
.....

A copy of the Queensland Museum Pocket Guide 'Frogs of South-East Queensland' is available to the first 200 frog finders.
