

Great barred frog

Mixophyes fasciolatus

Photo Eva Ford, MRCCC

- A beautiful medium-large frog with very dark eyes and a 'broad head.
- Needs leaf litter where it burries, using its mottled brown colouration as camouflage.
- Commonly found along permanent and ephemeral streams but also visits dams close to forests.
- Has had some of us fooled into thinking a duck is calling nearby with its 'wark wark wark wark' call!
